

Conquering the Wees & Poos

Management of functional bowel and bladder difficulties in children

.... the basics and beyond

ONLINE (each module over 3 sessions)

Tuesdays

The Basics - 5th, 12th and 19th August 2025

Beyond the Basics – 26th August, 2nd and 9th September 2025

10:30am – 12 noon (Aust EST)

Brisbane/Sydney/Melbourne/Canberra/Hobart – 10:30am – 12 noon (AEST) – Darwin/Adelaide – 10:00am – 11:30am (ACST) - Perth – 8:30am – 10:00am (Aust WST)

Most children gain full control over their bladder and bowel functions between the ages of 2 and 4 years. However, in at least 10% of children, issues such as anxiety, withholding, sensory differences, food intolerances and physiological differences can interrupt continence attainment. Successful management requires consistently applied up-to-date medical knowledge, excellent rapport building, realistic family support, advocacy and interaction with all carers involved.

Introductory Module -The Basics – this workshop module will provide participants with an overview of the clinical management of urinary incontinence, bedwetting and chronic constipation/soiling (encopresis) in children aged 3 – 15 years. Including:

- an overview of toileting milestones and some hints/tricks for addressing issues with establishing initial continence in young children
- an overview of the aetiology of chronic constipation/ soiling, urinary incontinence and enuresis (bedwetting)
- assessment and intervention knowledge and tools using a medically-informed behavioural management approach.

Advanced Module - Beyond the Basics - the advanced module of this workshop will provide participants with the ability to identify, discuss and apply continence strategies for complex cases, including children with developmental and physical diagnoses, and those who fail first-line treatment. This module of the workshop will cover:

- application of knowledge and strategies covered “the basics workshop” with more complex cases (eg developmental disabilities)
- the impact of anxiety and other socio-emotional aspects on participating in toileting routines across a variety of cohorts

Participants for the Advanced module will need to have attended a *Learning to Conquer the Wees & Poos* (the basics) workshop prior to registering for this advanced module

Workshop Delivery

The workshop will be delivered over 3 weeks (per module) via an integrated system of pre-reading material (eg familiarisation with provided resources), weekly pre-recorded lecture presentations and the scheduled online tutorial sessions. Participants will need to allocate **1.5 - 2 hours per week for self-study** outside the online group sessions. Workshop delivery includes:

- **Pre-Reading/Workshop Manuals** participants will be mailed a hard copy of the workshop manual which will include:
 - some pre-re Zi Mei Events on info@zimei.com.au

- presentation notes, covering the online presentation content as well as the case studies used in the group tutorial sessions
- numerous resources to assist with implementing workshop content into clinical practice
- **Online content** one week prior to the online tutorial session, participants will be emailed a link to the pre-recorded online presentation related to the upcoming tutorial session. Presentation content will be **approx. 1 - 1½ hours in length** – participants are expected to have viewed this content prior to participation in the scheduled group tutorial session (NB. the link to this content will expire on commencement of the accompanying tutorial session).
- **On line group tutorial sessions** – using Zoom videoconferencing, participants will have the opportunity to link into three (or six) consecutive interactive tutorials (group discussions, case studies and Q&A sessions) to integrate their newly acquired knowledge and skills. Participants will be emailed the link (including password) to their scheduled sessions.

Participants will need to have access to internet facilities including Zoom and webcam to ensure that they are able to download and view workshop content, as well as actively participate in the on line group tutorials and agree to the [online T&C](#). To fully participate in the interactive components of the group tutorial sessions, participants are encouraged to log on using a tablet, laptop or desk top computer. While utilising a mobile phone to access these sessions is possible, the functionality of the device may limit participant's ability to fully engage in the interactive components of the session.

Workshop Recording

Please note to safeguard the copyright of material presented, maintain the confidentiality of case discussions and the privacy of participants, **this workshop WILL NOT be recorded.**

This workshop is suitable for occupational therapists, physiotherapists, psychologists, continence advisors, child health nurses and school health nurses.

About the Presenter

Rebecca Khan is an occupational therapist, mother and continence advocate who runs a private allied health clinic in Brisbane, Australia. She has first-hand experience with have a tricky body, having lived with Ulcerative Colitis and associated surgical interventions for 20 years. As a volunteer, she has facilitated a support group for Crohn's and Colitis Australia for 10 years.

Rebecca has presented on the topics of paediatric continence and self-care for various organisations including Continence Foundation of Australia, Qld Health and Zi Mei Events.

In 2011, Rebecca authored the clinical resource *Conquering Wees & Poos: a learning package for continence clinicians* (©Queensland Health 2012) through the Queensland Children's Hospital. Rebecca graduated from the University of Qld in 2001 and has been assessing, treating and researching best practice for paediatric incontinence since 2002.

Registrations for this workshop are now open. Register via our website www.zimei.com.au Further workshop enquiries can be directed to Zi Mei Events on info@zimei.com.au or (07) 3358 3689
